

Comp Clean II is a specially formulated Diester synthetic fluid capable of dissolving Varnish and solubilizing sludge from lubricating Systems while those systems are operating. Primary Benefits include:

- Superior corrosion protection
- Compatible with mineral oils and all CPI synthetics
- High flash point
- Non-toxic

This high-performance lubricant is recommended for use In flooded rotary screw compressors as a:

- Flushing fluid during changeovers
- Cleaning fluid for compressor lubricating systems
- Short-term lubricant (up to 500 hours)

Your local CPI representative can help you determine the appropriate product and viscosity for your needs.
